Juneteenth updated plans

June 16, 2020

Dear colleagues:

Based on the June 11<sup>th</sup> enrollment report prepared by the KCCD Institutional Research Office, BC shows summer 2020 enrollment 10% over this time last year, indicating our recent reintroduction of our normal outreach and recruitment activities in our virtual environment is correcting the deviation from normal enrollment patterns we witnessed in May.

We are expecting a similar uptick in our fall enrollments as the semester progresses.

### COVID-19 Update

Yesterday, June 15, Governor Newsom delivered [a COVID-19 briefing](#) in which he noted that there are several California counties on a watch list as they have failed to meet key criteria set forth in high Resilience Roadmap reopening guidelines. Among several other central valley counties, Kern is on the list for not failing to meet the thresholds for average tests per day, case rate per 100,000 residents, and test positivity rate for three consecutive days.

A new state model released yesterday also shows that with Kern County COVID-19 cases on the rise, Kern is expected to exceed its 78 ICU bed capacity as soon as July. Kern is looking to increase the number of ICU beds to 294 as a part of its surge plan, but the model still indicates that Kern will surpass that expanded capacity by November. The model also predicts Kern County won't see its overall peak in ICU hospitalizations until February 2021 at 436 projected hospitalizations.

As we have seen for the past several months, these models shift based on our behaviors and based on the nature of the viral spread. [During a briefing](#), Kern Public Health issued a strong reminder to residents to continue social distancing, hygiene practices, and wearing of face coverings.

As of today June 16 at 3:30 p.m., the [Johns Hopkins University Dashboard](#) shows global cases have surpassed 8 million while the U.S. approaches 120,000 COVID-19 related deaths. Here is the table that captures the difference in the numbers from the last time I published a Renegade Roundup.

	June 7	June 16	Difference	Percentage
<b>World</b>	6,952,505	8,139,560	1,187,055	17.1%
<b>U.S.</b>	1,927,428	2,134,521	207,093	10.7%
<b>California</b>	128,739	156,517	27,778	21.6%
<b>Kern</b>	2,730	3,462	732	26.8%

The [IHME Dashboard](#) updated its projections again on June 15, showing a projection of 201,129 total COVID-19 deaths in the United States (15,155 of them in California) by October 1, 2020.

That's all for now.  
Until next time.

With much Renegade Pride and Collegiality,  
sonya
